SITHIJA DILSHAN

DATA ANALYST

Linked In | Portfolio | 0765378553 | sithijadilshan2k03@gmail.com

SUMMARY

Data Analyst with hands-on experience in ERP-based KPI reporting, delivery analysis, and warehouse analytics gained through an ongoing internship in a business operations environment. Final-year Data Science undergraduate skilled in Python, SQL, and Power BI, with proven ability to design end-to-end data pipelines, from ETL and data warehousing to OLAP modelling and dashboard development. Strong analytical thinking, problem-solving, and communication skills, with a keen interest in applying data-driven insights to logistics and warehouse operations.

EXPERIENCE

Operations Data Analyst - Fine Enterprises (Fine Group / KEN Power Tools Sri Lanka) **Jan 2026 – Present**
Operations Department — ERP-based KPI reporting, delivery analysis, and warehouse analytics.

EDUCATION

Ananda College, Colombo 10 **2022**
Advanced Level - Mathematics | English Medium

Sri Lanka Institute of Information Technology (SLIIT) **2023 - Present**
BSc (Hons) in Information Technology Specializing in Data Science (Undergraduate)

SKILLS & ABILITIES

Programming Languages: Python, R, SQL, Hive SQL, Java, C++, JavaScript, PHP, HTML, CSS, Kotlin
Data Analytics Tools: Microsoft Excel, Power BI, DAX, Jupyter Notebook, Google Colab, RStudio
Databases: MySQL, Microsoft SQL Server, MongoDB
Cloud: Amazon AWS, Microsoft Azure
Software Engineering: Visual Studio Code, Visual Studio, IntelliJ IDEA, Android Studio, Git
Soft Skills: Leadership, Teamwork, Communication, Problem Solving
Languages: Sinhala, English

ACADEMIC PROJECTS

Data Analysis:

AdventureWorks Sales Analytics Dashboard – Microsoft Excel

- Built an interactive Excel dashboard using PivotTables, Power Pivot, and slicers to analyze sales, profit trends, customer segments, and product performance.
- *GitHub: Project Link*

Blinkit Sales Performance Dashboard – Power BI Project

- Built an interactive Power BI dashboard for Blinkit analyzing key KPIs, sales trends, and outlet performance using DAX, Power Query, and advanced visualizations.
- *GitHub: Project Link*

Electric Vehicle Data Analysis – Tableau Project

- Developed an interactive Tableau dashboard analyzing electric vehicle adoption, market share, and geographic trends using KPI-driven visualizations.
- *GitHub: Project Link*

AI / ML Projects:

AGENTFLOW – Multi-Agent AI Group Project Organizer

- Developed a multi-agent AI system for automated and fair task allocation using NLP and optimization techniques. Built agents for task planning, progress monitoring, deadline reminders and communication summarizer agent.
- **Technologies**: FastAPI, Python, NLP, Next.js, MongoDB
- *GitHub: Project Link*

Data Science:

CrimeCast – Crime Arrest Prediction System

- Developed ML system to predict crime arrests using Chicago crime data. Engineered temporal, spatial, and categorical features and handled class imbalance with SMOTE.
- **Technologies**: Python, Scikit-learn, XGBoost, Pandas, NumPy, FastAPI
- *GitHub: Project Link*

Data Engineering & Business Intelligence:

T20 Cricket Analytics — End-to-End Data Warehouse & BI Pipeline

- Designed a star-schema data warehouse and built an SSIS ETL pipeline to extract, clean, and transform T20 cricket data (2003–2023) from multiple sources into staging and warehouse layers, including surrogate key generation.
- Implemented an OLAP cube in SQL Server Analysis Services (SSAS) with Date, Team, Venue, and Match dimensions and measures such as Total Runs and Ball Count; performed slicing, dicing, drill-down, and pivoting in Excel.
- Built interactive Power BI dashboards with matrix reports, cascading slicers, Year-Quarter-Month drill-down hierarchy, and drill-through reports for detailed analysis.

Software Engineering:

Fitness Center Web Application (MERN Stack)

- A full-featured web app built to manage gym memberships, personalized fitness tracking, virtual health consultations, e-pharmacy, inventory, finance, and more — all in one seamless platform.
- *GitHub: Project Link*

Smart Campus Operations Hub – Full-Stack Web Application (React, Spring Boot, Tailwind CSS)

- Built a full-stack university facility management platform with resource booking and conflict detection, an incident ticketing system, real-time notifications, and role-based access control (User/Admin/Technician) secured via local authentication and Google OAuth 2.0.
- *GitHub: Project Link*
